OPEN SOURCE RELEASE

Stop Paying ~~$300/Mo~~ For Outbound Sales.

How we built and open-sourced **OpenExplee** — the 100% free, self-hosted replacement for Explee, Apollo & Instantly.

⚡ Vikash Vardhan • @vikashvardhan

THE PROBLEM

The Outbound SaaS Tax is Broken.

Founders and growth teams are burning thousands of dollars every year on basic software wrappers.

❌ Legacy Outbound SaaS

- $100–$300 monthly fee
- $0.04 to $0.15 per verified lead
- Shared IPs ruin domain rep
- Zero local AI customization
- Vendor lock-in & paywalls

✅ OpenExplee (MIT)

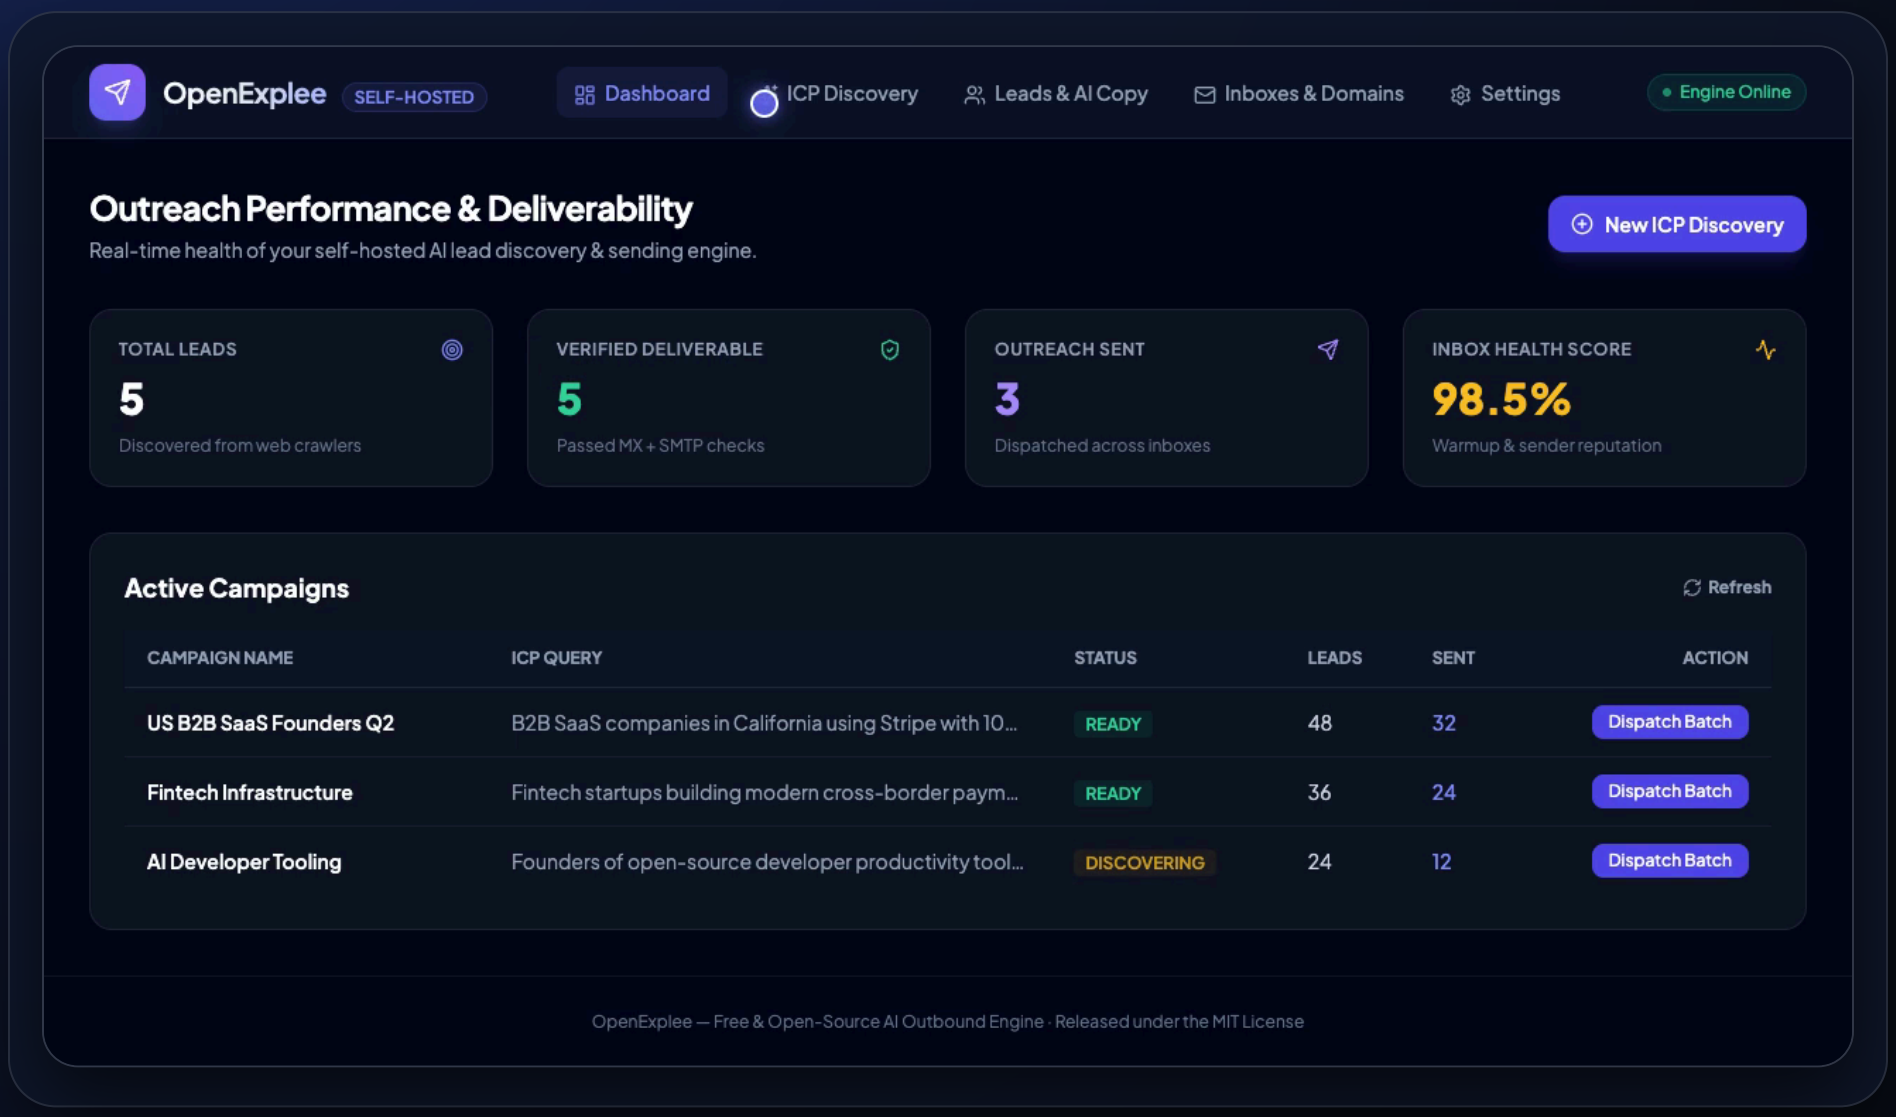

- **$0 / month** forever
- **$0** SMTP verification
- 100% self-hosted & private
- Runs local Ollama / Claude CLI
- Secondary domain firewall

$3,600	$0.00	100%
SAVED / YEAR	COST PER EMAIL VERIFICATION	DATA PRIVACY

FEATURE 01

1-Click Website to Campaign.

Enter any company URL. OpenExplee extracts product positioning, ICP angles, and crafts tailored pitches in seconds.

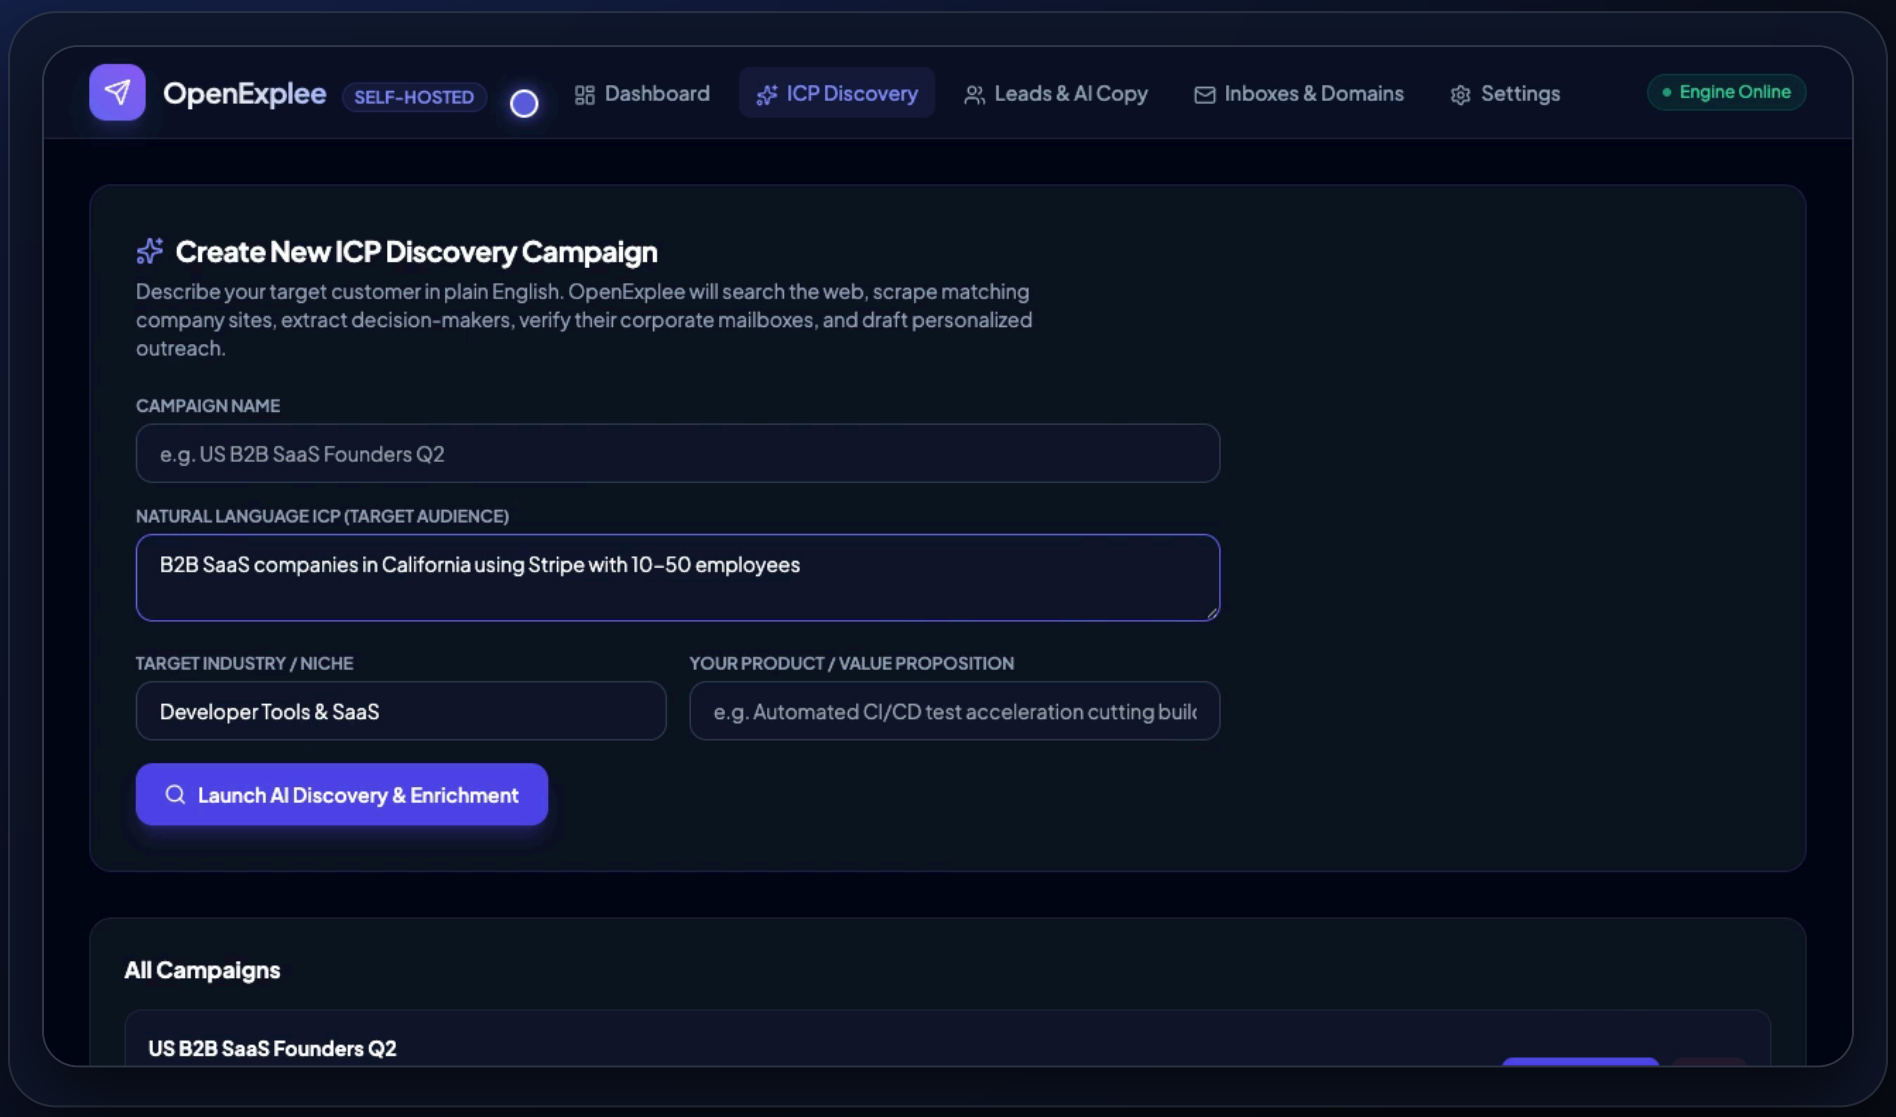

Uses automated headless Chrome + local Ollama / Claude CLI to turn raw landing pages into high-converting B2B outreach copy.

FEATURE 02

4-Tier Mailbox Verification at $0.

Never pay $0.04 per lead to ZeroBounce or NeverBounce again.
Direct socket verification right from your server.

Tier 1
RFC Regex

Tier 2
Disposable DB

Tier 3
DNS MX Records

Tier 4
SMTP Handshake

SECURITY & DELIVERABILITY

The Primary Domain Shield.

The fastest way to ruin a startup is blasting cold outbound from your primary domain. OpenExplee prevents this by design.

🛡️ Built-in Deliverability Firewall

🔒 **Blacklists Primary Domain:** Hard blocks sending from your root domain (e.g. `viktron.ai`).

🔄 **Secondary Lookalikes:** Rotates outbound through safe inboxes (e.g. `getviktron.com`).

🎯 **Automatic Reply-To & Cc Routing:** All responses route directly to your primary inbox so you never miss a deal.

⚡ **Live DNS Audit:** Checks SPF, DKIM, and DMARC health before firing.

AI ARCHITECTURE

Bring Your Own Model ($0 Tokens).

Plug into commercial APIs or run completely free on your local GPU.

💻 100% Free / Local

- **Local Claude Code CLI:** Personal subscription routing
- **Thor Jetson / Ollama:** Qwen 2.5, Llama 3 on local GPU
- **Zero API bill.**

☁️ Ultra-Fast Cloud

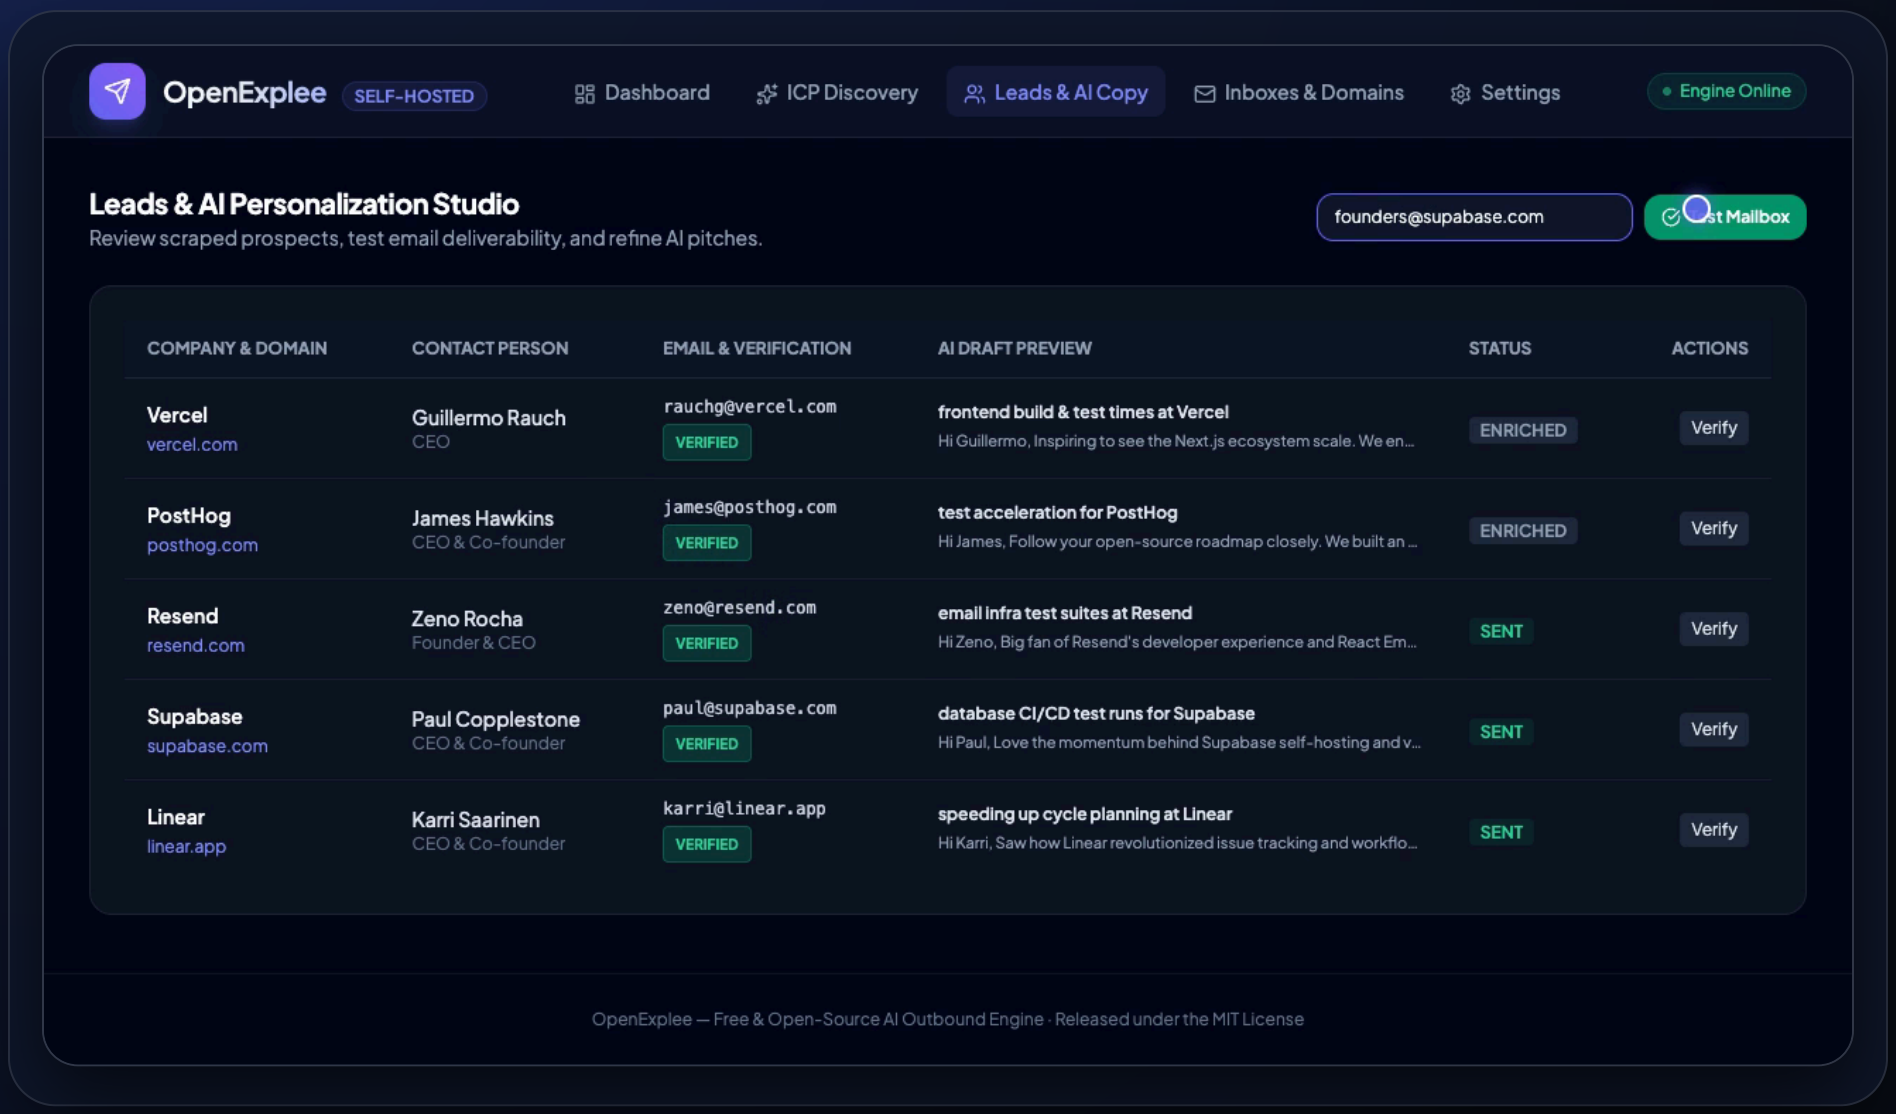

- **Gemini 2.5 Flash:** Fractions of a cent
- **OpenAI GPT-4o-mini**
- **Groq:** 500+ tokens/sec

`MCP Native` Supports Claude Code and Cursor out of the box via `http://localhost:8000/mcp`.

WORKFLOW

Automated Dispatch & Booking.

Multi-inbox rotation with native Cal.com booking link integration.

Every outreach email includes automated personalization, unsubscribe compliance, follow-up sequencing, and direct calendar scheduling links.

SAVE THIS SLIDE

The Complete OpenExplee Stack.

Everything you need for enterprise outbound sales in a single self-hosted container.

Feature	Explee / Apollo	OpenExplee (MIT)
Cost	$100–$300/mo	**$0 Forever**
Mailbox Verification	$0.04 / email	**$0 Socket SMTP**
AI Engine	Proprietary / Locked	**Claude / Ollama / Gemini**
Domain Safety	Manual	**Primary Domain Shield**
Hosting	Closed SaaS Cloud	**1-Click Docker**
